

Re SE-37

1. If a consid of various combinations is desired
note that SE-27 "conclusions" are a model &
would normally have been followed.

2. Total embargo

3. Blockade + embargo

4. blockade, embargo, + air instead of key als?
ie rail + waterways . . .

These are the big ones.

SE-37 cd go into lesser such as aoc
boc and if IAC desires.

Statement of the prob can either be redone as per
SI T/S or via LB's suggestion in dets.

Note that if you have b you also have equiv
of a. (eg blockade w/ have to be VA, i. w/
carry effective embargo automatically)

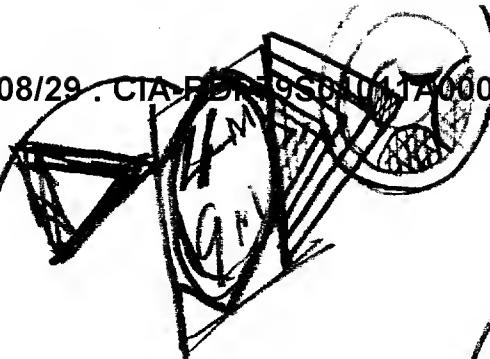

2. fm badly drafted. - herewith a correction.

3. Re chinatis of CIA paper as a poss back ff
for IAC coordn.
